

A Summary of Our Services

www.ajollyconsulting.co.uk

Project management is an expansive field, integral to the success of projects from inception to final sign-off. It is distinguished by a variety of pivotal services, each contributing to the project's success. At the core of our service offering is project planning, where we meticulously delineate project goals, objectives, and scope.

AJC provides project management services with a focus on mitigating the multitude of risks inherent in project execution. Employing proven methodologies alongside cutting-edge strategies and practices, our services are adaptable to a broad spectrum of projects, encompassing business restructuring, intricate IT system developments, regulatory adherence, and other pivotal challenges.

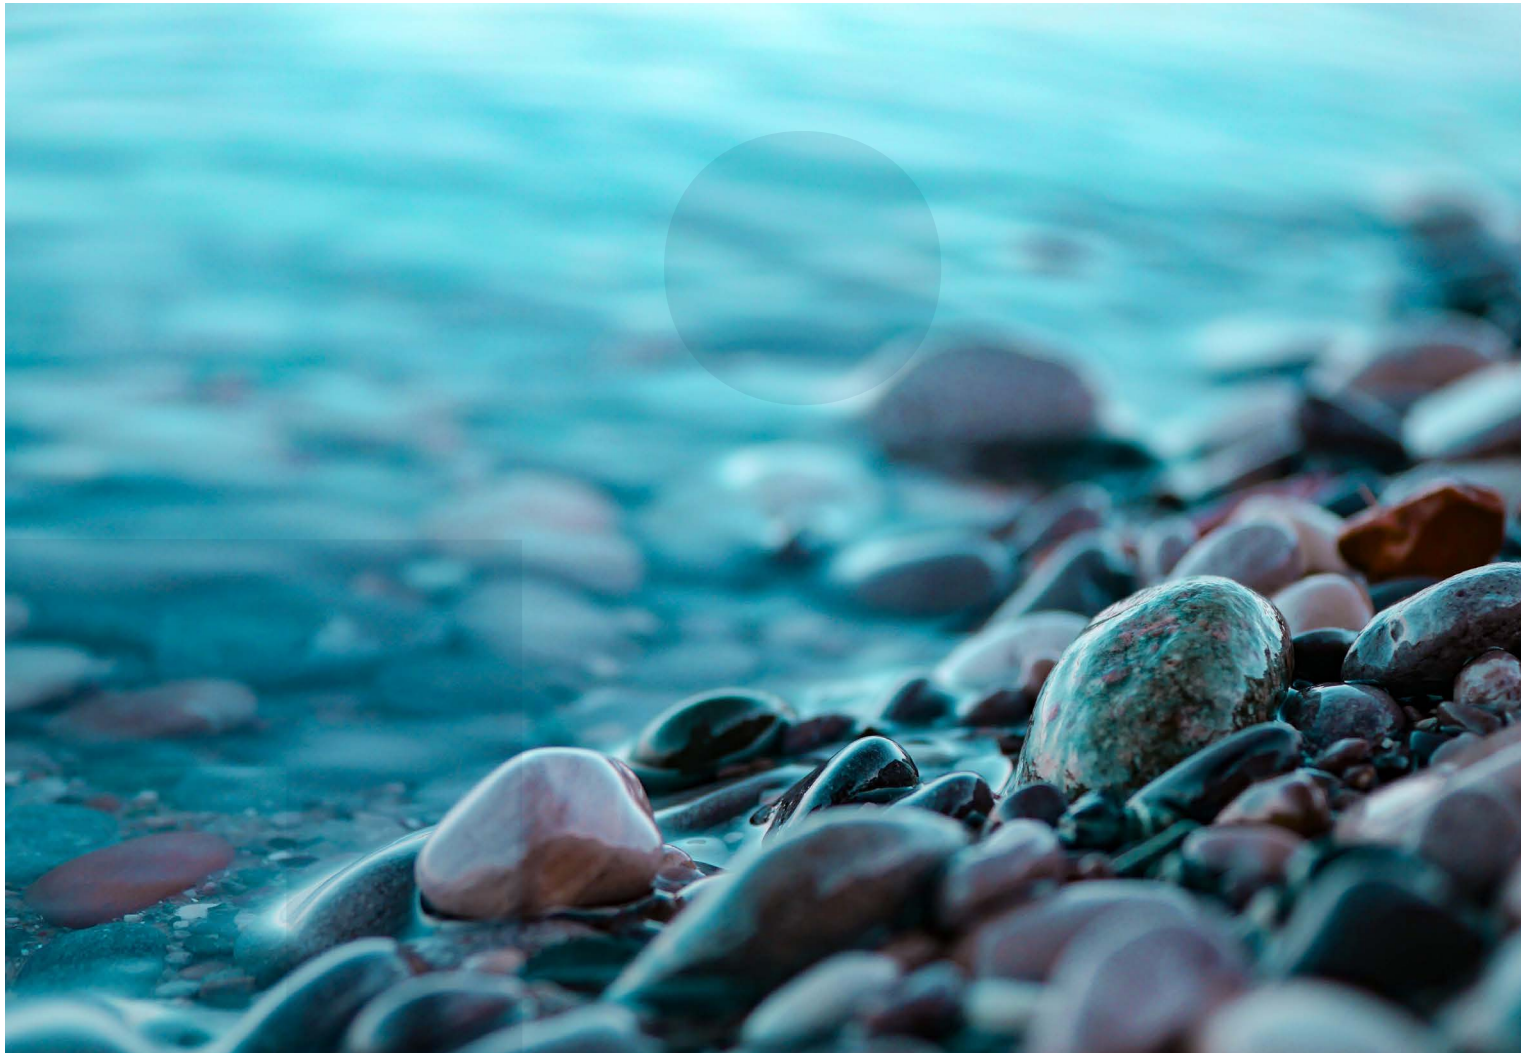

Guidance,
Protection,
Peace of Mind.

How AJC Can Help

AJC helps clients from a broad range of organisations, in many different sectors, assess and manage risk, build resilience to maximise outcomes.

We are trusted by our clients to work with them to make important decisions quickly and proportionately. AJC project managers are among the best in the field, because in addition to being experienced practitioners, they are all professionals with a variety of practical backgrounds.

Every project is tackled with AJC's honest, clear and practical approach. We guide our clients with clarity and confidence, empowering them to make the decisions and take the steps to protect and strengthen their organisations.

Our objective is to **enhance the results** of project execution. With our help, you can be **confident** that even the most complex projects will **run as smoothly as possible.**

AJC's Project Management Services

We produce comprehensive schedules that chart the course for timely task completion, and our resource management is designed to deploy assets with maximum efficiency, ensuring peak project performance. Our risk management procedures are robust, encompassing the identification and pre-emptive resolution of possible obstacles.

In today's dynamic business environment, our projects recognize the critical role of change management. In a rapidly evolving world, businesses must consistently adapt to change to avoid lagging behind competitors. Implementing effective change management is key to ensuring that an organisation can navigate change thoughtfully and strategically, maximising benefits while minimising risks.

Effective communication channels and stakeholder engagement strategies are instrumental in maintaining a coherent project trajectory, ensuring transparency and collective investment in project goals. Our quality control is stringent, guaranteeing that the output meets the high standards expected of us. Financial oversight is also critical, and we apply rigorous fiscal discipline to prevent cost overruns.

Depending on your organisation's culture and project requirements, we will tailor the methodology to align with either waterfall, agile, or a combination of both (Wagile). This customised approach ensures that we provide the appropriate framework for your organisation's success. AJ Consultants collaborates with clients across various industries, offering skilled teams of project managers or PMO Analysts to support projects throughout the entire building lifecycle. This includes developing the initial business case, overseeing procurement, and managing the design process.

Our project managers are seasoned in orchestrating the multifaceted aspects of project delivery, proficiently troubleshooting, adjusting plans dynamically, and steering projects to successful conclusions. We are committed to delivering a streamlined project journey from the outset to completion, meeting its stipulated time, quality and budgets.

Our services are tailored to
each individual business,
aimed at delivering outstanding
value and the appropriate,
proportionate solution.
