

Business Continuity Scenario Testing

www.ajollyconsulting.co.uk

AJC's rich experience in Business Continuity knowledge spans many sectors and industries. With that knowledge, we can develop exercises that stress test client business plans, realistically, efficiently, and effectively.

We assist by not only testing your Incident Response Plans, but providing engaging and interactive training for members of your staff and a formal report for use in remediating identified areas for improvement.

Guidance,
Protection,
Peace of Mind.

How AJC Can Help

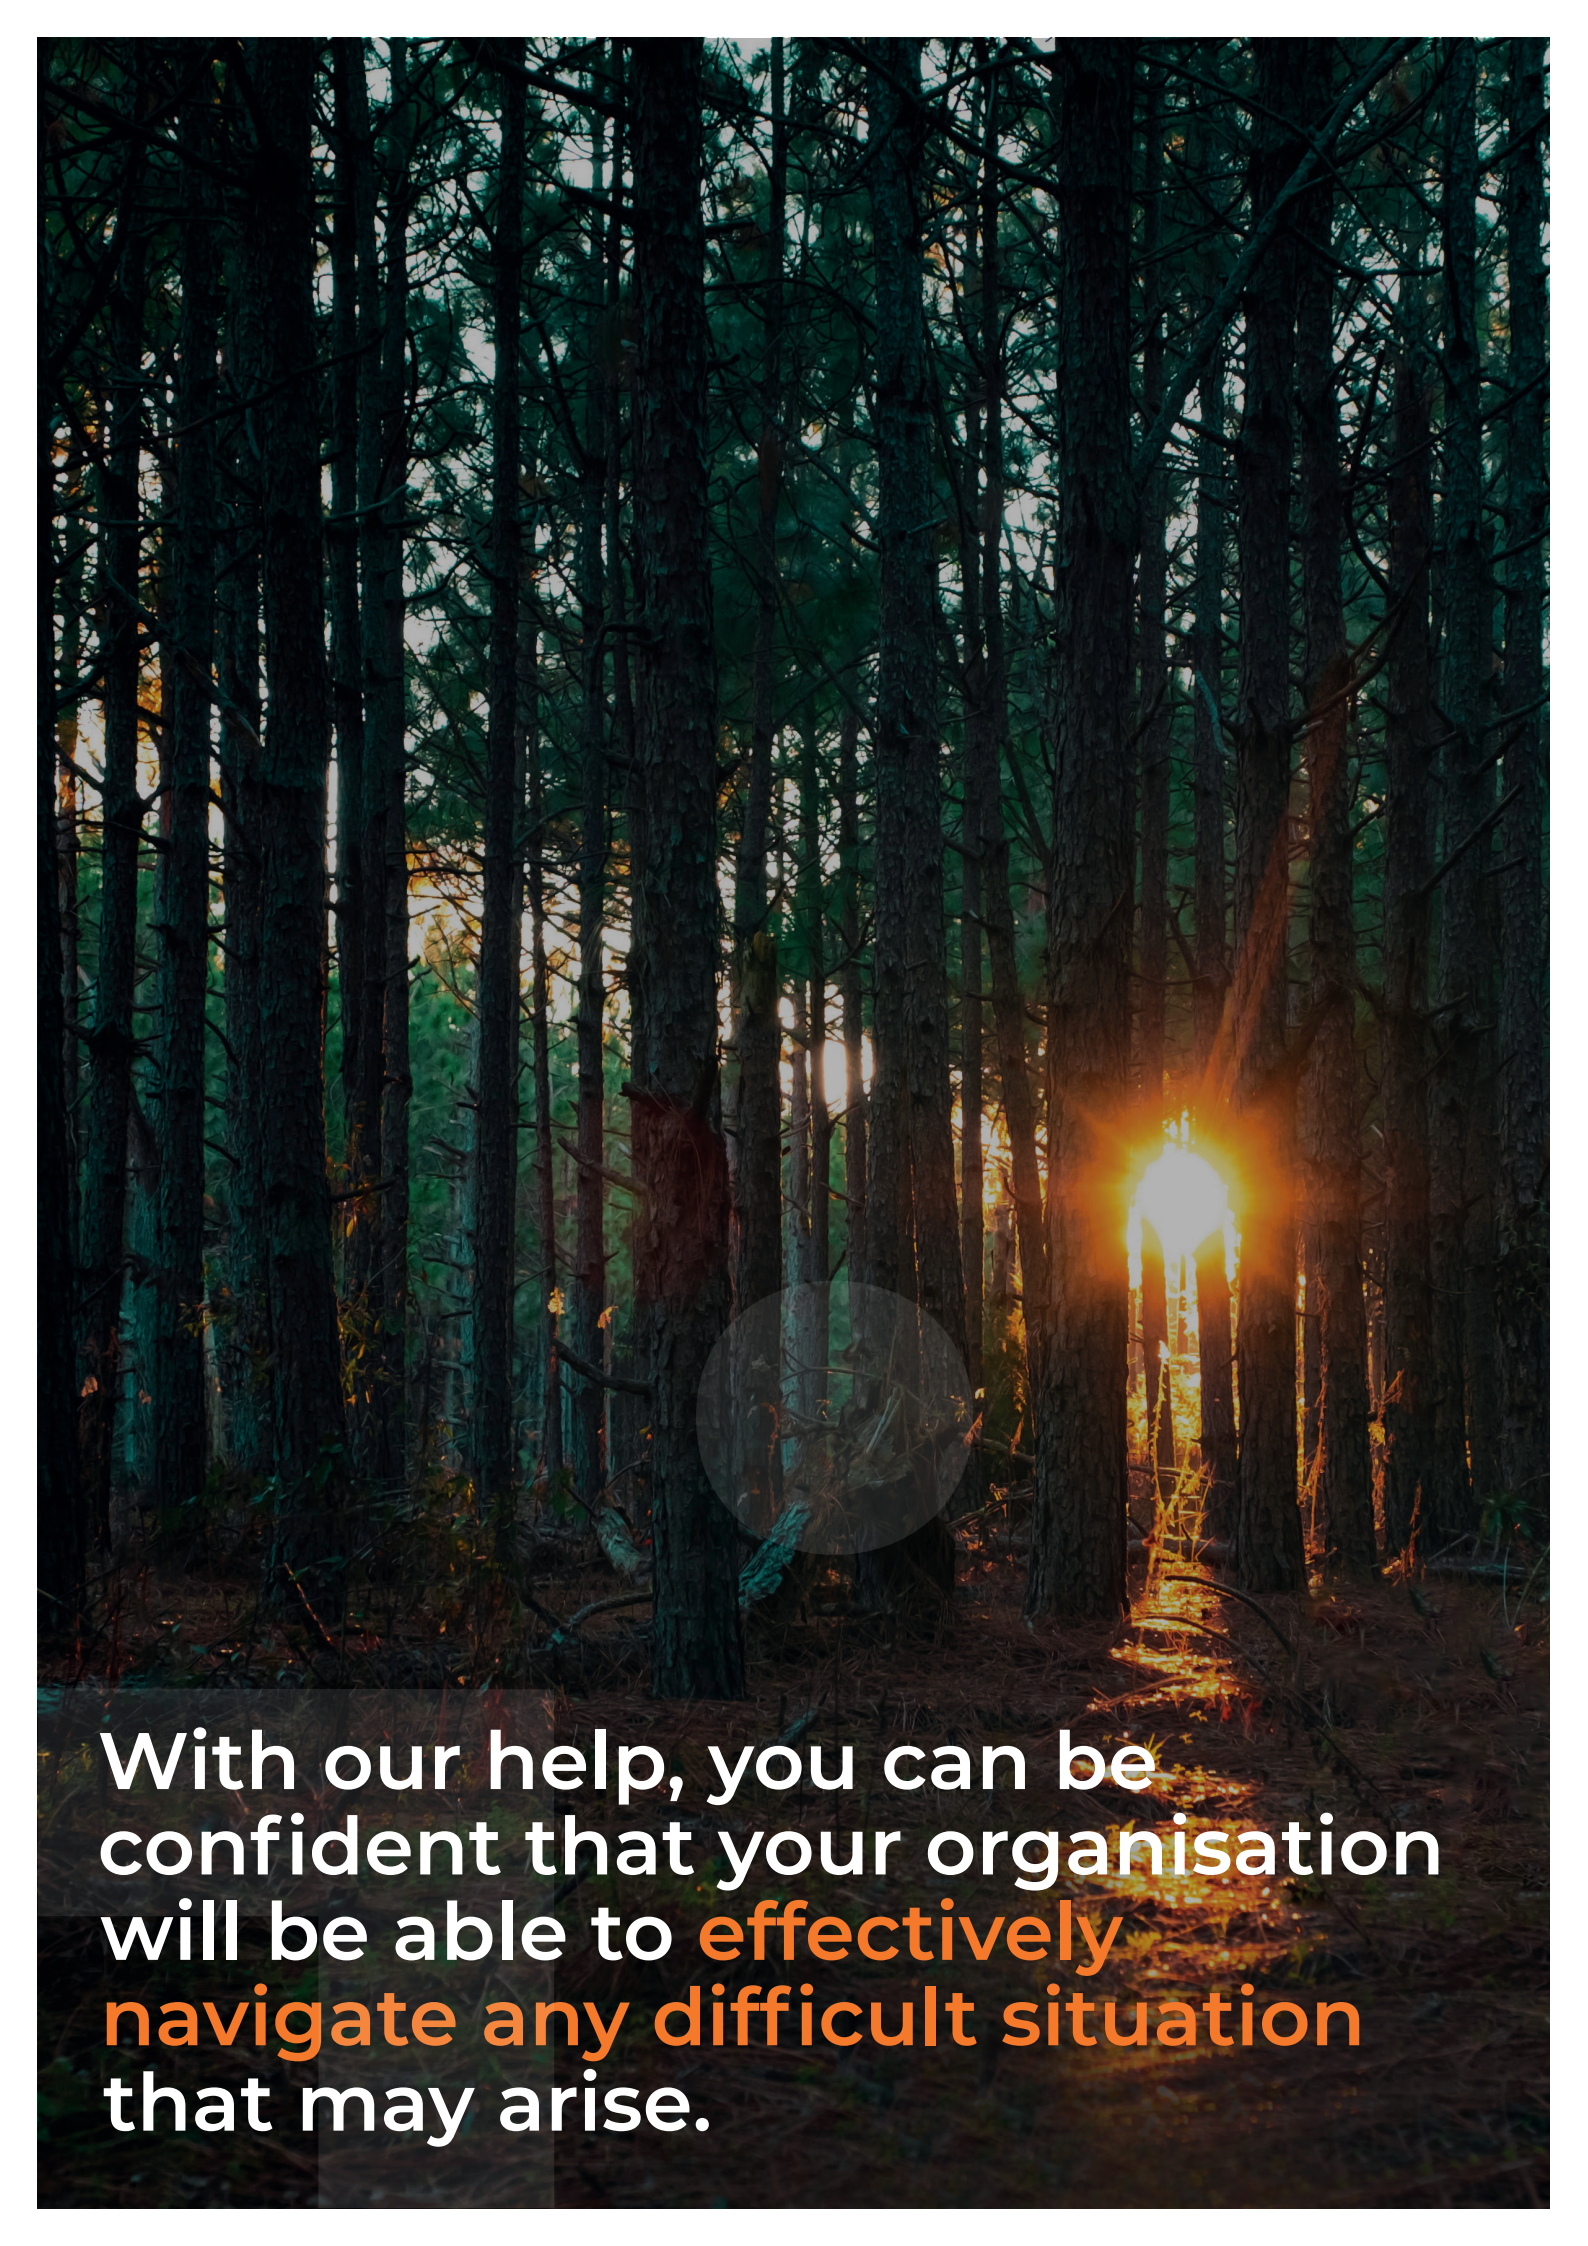

Our clients acknowledge our ability to plan a scenario tailored to their business infrastructure, helping them be best positioned to deal with the unexpected.

We have a team of experienced professionals, who together have amassed over 500 years of experience across multiple sectors, so we can be trusted to deliver a service that is tailored to meet your needs.

Every situation is tackled with AJC's honest, clear and practical approach. We guide our clients with clarity and confidence, empowering them to take the steps to be proactive to protect and strengthen their organisation and prepare for any situation that may occur.

Let us help you
prepare for the
unexpected and
ensure your business
is always ready to
navigate challenges.

With our help, you can be confident that your organisation will be able to **effectively navigate any difficult situation** that may arise.

AJC's Business Continuity Scenario Testing Service

Ensuring Resilience Through Proactive Scenario Testing

We recognise that preparing for potential disruptions is essential to maintaining business continuity and operational resilience. Business scenario testing plays a pivotal role in ensuring that organisations are equipped to handle various risks effectively. Our approach is comprehensive, detailed, and tailored to meet the unique needs of each client.

1. Customised Scenario Design. We collaborate closely with clients to design realistic and relevant testing scenarios that address potential disruptions. These scenarios encompass a range of challenges, including:

- Cyber security incidents (e.g., ransomware attacks).
- Operational outages (e.g., IT system failures).
- External factors (e.g., supply chain disruptions or natural disasters).

Each scenario is crafted to reflect the unique risks and vulnerabilities of the client's business.

2. Real-Time Testing and Simulation. Our scenario testing simulates running through a multi-day timeline that mimic actual crisis conditions. This allows teams to:

- Identify gaps in response procedures.
- Evaluate decision-making under pressure.
- Test the functionality and coordination of existing continuity plans.

These simulations can range from tabletop simulation exercises to full-scale in person operational tests such as premises access attempts, depending on the client's requirements.

3. Risk Evaluation and Impact Analysis. We assess the outcomes of scenario tests to understand:

- The potential impact of disruptions on critical business processes.
- The effectiveness of response strategies.
- Areas requiring improvement or additional resources.

We provide a post-exercise report to ensure that organisations can prioritise and address their most critical vulnerabilities.

4. Building Team Preparedness. Our services emphasise team readiness by conducting:

- Cross-departmental collaboration exercises.
- Training sessions for key personnel.

These efforts help embed resilience into the organisational culture.

5. Ongoing Support and Monitoring. Scenario testing is not a one-time event. We provide ongoing support to:

- Schedule regular tests and updates, noting past and present performance.
- Monitor emerging threats that may require new scenarios.
- Ensure continuous improvement in organisational resilience.

A Commitment to Business Resilience

At AJC, we go beyond merely testing scenarios. We aim to instil confidence, minimise disruptions, and safeguard the trust of clients, partners, and stakeholders. By proactively identifying vulnerabilities and strengthening response strategies, we help organisations build a resilient future.

Our tailored approach ensures that **each business receives a solution proportional to its risks and operational requirements**, a statement that our clients have routinely attested to. We take pride in delivering unique, fun, and highly interactive learning experiences that redefine expectations and set a new standard of excellence.
